

The image features a dark blue background with several thin, parallel diagonal lines in various colors including red, orange, teal, light blue, and yellow. The text 'cyber discovery' is centered in a white, italicized, sans-serif font. The word 'cyber' is positioned above 'discovery', and both are slanted to the right to match the overall aesthetic of the graphic.

# Cyber Discovery launches in Scotland!

- Scottish teenagers will now have the opportunity to join the popular extra-curricular cyber security training programme, [Cyber Discovery](#). Registration for Cyber Discovery is now open for the year two intake, along with the chance to complete CyberStart Assess. Registration closes on 7 January 2019.
- To help introduce cyber security as a profession to more young people, the UK Government launched its landmark cyber security training programme aimed at 14-18-year-olds – ‘Cyber Discovery’. Last November nearly 24,000 students had a go at the initial assessment – CyberStart Assess. From there, thousands of students progressed through the subsequent stages, CyberStart Game and CyberStart Essentials, before the top 170 students participated in a face-to-face CyberStart Elite camp.

# Cyber Discovery clubs

- As well as encouraging students to take part in this first stage of the programme, Cyber Discovery are also looking for schools, parents and other volunteers to set up and host extracurricular Cyber Discovery clubs.
- These volunteers can become club leaders and provide students with guidance, motivation and support throughout the programme. No prior knowledge of cyber security is required as most of the programme is delivered online through a gamified learning platform that is designed to encourage students to progress independently. Whether you are a careers advisor, head of year or languages teacher, the only requirement is the ability to encourage students to succeed.
